## SKILLS

---

HTML | CSS | JavaScript | ES6 | Bootstrap | React | Redux | AngularJS | NodeJS | Express  
PostgreSQL

## PROJECTS

---

### PAPER TRADE - Personally Developed Trading Application

June 2017

AngularJS, NodeJS, PostgreSQL - <http://papertradeapp.herokuapp.com/#!/>

Set up a practice stock trading Website that logs real-time trades

- Integrated two separate stock quote APIs to give real-time stock information to users
- Used AuthO to have users log in through Facebook, Google, Twitter, and other social media sites
- Used recursion and callbacks to apply the most accurate information for quotes and gain/loss information
- Developed the web application while learning the necessary languages to build a functional site simultaneously

### CHASE.COM - Developed a clone of the JP Morgan Chase Website

July 2017

React, Redux, NodeJS, PostgreSQL - <https://github.com/CloneWells FargoChase>

Developed a clone for the Chase banking Web site.

- Assisted in creating the landing page, built the schema for the database and built several of the Node endpoints.
- Worked collaboratively with team members and helped to debug code
- Learned and implemented React and Redux to produce the site within three weeks

## EXPERIENCE

---

### FIDELITY INVESTMENTS

American Fork,

Utah

Broker

June 2012-April 2017

- Broker for stock, bond, mutual fund, CD, and various other fixed income trades for clients
- Daily study of market indices, market forecasting, and conditions to maintain a high knowledge of securities trading
- Attention to detail to make sure that securities trades were placed accurately for clients
